

**A powerful, flexible Content Management Solution that is easy to install, use, and extend.**

Plone is among the top 2 percent of all open source projects worldwide, with 340 core developers and more than 300 solution providers in 57 countries. It is available for all major operating systems.

The Plone project has been actively developed since 2001, is available in more than 40 languages, and has the best security track record of any major content management system.

**Providing community support for Plone at Penn State...and around the world.**

We help Penn State departments, colleges, and campuses through consulting, product development, documentation, and training.

*"Partnering with WebLion expands my team. It's not just us anymore; we can rely on everyone in WebLion, too. That's critical when you have a small Web shop."*  
— Michael Hofherr, Manager of Information Technology, Smeal College of Business at Penn State

**Promoting open source web publishing for education.**

We are a community of decision makers, developers and integrators, Web site administrators, and Web content owners interested in supporting the needs of education through Plone. Our goal is to provide opportunities for collaboration, knowledge sharing, and support for all levels of learning.

*"Plone provides me with an easy way to deliver instruction, an effective tool for students to create, and collaborate on the creation of, content. "*  
— David Groos, Science Teacher, Minneapolis Public Schools
